PROFILE

Early-career Product Designer focused on human-centered AI, B2B systems, complex workflows, and decision support. Combines independent product-design work with B2B sales and customer-operations experience supporting US business customers. Skilled in information architecture, user flows, wireframing, prototyping, interface analysis, design-system foundations, and AI-assisted research.

SELECTED PRODUCT DESIGN PROJECTS

Valora | AI-Assisted B2B Sales-Coaching Platform | Independent Product Design Project

- Designed manager dashboards and multi-role workflows for evidence review, coaching, AI confidence and governance, permissions, sharing, and responsive use.
- Built information architecture, design-system foundations, and a working prototype for complex manager-representative workflows.
- Translated sales-performance and coaching requirements into clear states, feedback loops, and decision-support interactions through iterative critique.

Noon | Mobile Product-Page Redesign | UX/UI Project

- Redesigned a mobile product page to improve hierarchy, trust, delivery clarity, product information, and access to the primary purchase action.
- Used competitive research and interface analysis to identify friction and guide the direction.

PROFESSIONAL EXPERIENCE

Concentrix Egypt | B2B Sales & Customer Operations | March 2024 - Present

- Support US business customers with registration, purchasing, pricing, product benefits, and account decisions across calls and email.
- Qualify leads, handle objections, conduct follow-up, and document interactions in Salesforce/CRM and Microsoft 365 workflows.
- Ranked within the top 2.5% of performers in Q1 2025 and exceeded performance targets for approximately ten months.

SKILLS
